

KHUSHALKUMAR

Curriculum Vitae

B.Tech Computer Science · Central University of Haryana · 3rd Year
+91 740913 8501 · khushalkumarsk@gmail.com · LinkedIn: @khush4lkum4r · Twitter: @Khush4l_Kum4r

1. PERSONAL INFORMATION

Full Name	Khushalkumar
Date of Birth	24 June 2005
Age	20 years
Nationality	Indian
Location	Uttar Pradesh, India
Languages Known	Hindi (Native) · English (Professional)
Availability	Immediate · Open to Remote / Hybrid / On-site
Email	khushalkumarsk@gmail.com
LinkedIn	linkedin.com/in/khush4lkum4r
Twitter / X	@Khush4l_Kum4r
Phone	+91 740913 8501

2. PERSONAL STATEMENT

Data-focused Computer Science student (B.Tech, 3rd Year) with hands-on Python and web development experience across 8 independent projects. Selected as Google Gemini Student Ambassador — chosen from the campus cohort — for demonstrated expertise in AI, analytics, and structured problem-solving. Skilled in building functional, well-structured software across two domains: Python (GUI applications, game logic engines) and Web Development (interactive browser-based tools, responsive layouts). Actively building proficiency in Pandas, NumPy, Matplotlib, and SQL to transition into data science and analytics roles. Seeking a Data Science or Software Development Internship to apply strong programming fundamentals, logical reasoning, and attention to data accuracy in a professional environment.

3. EDUCATION

B.Tech — Computer Science and Engineering *2023 – Present (Expected 2027)*
Central University of Haryana *Haryana, India*

- Currently in 3rd Year with focus on core CS subjects and applied programming labs.
- Key Modules: Data Structures & Algorithms, Database Management Systems, Operating Systems, OOP, Computer Networks.
- Applied coursework in lab projects covering data organisation, SQL query optimisation, and system design.

Class 12th — Science Stream (ISC Board) *2020 – 2021*
Sacred Heart Convent Higher Secondary School *Uttar Pradesh, India*

- Subjects: Physics, Chemistry, Mathematics, Computer Science.
- Developed foundational programming and logical reasoning skills through CS coursework.

4. PROFESSIONAL EXPERIENCE

Gemini Student Ambassador *Aug 2025 – Dec 2025*
Google (Student Ambassador Program) *Haryana, India · On-Campus*

Represented Google's AI tools and Gemini models on campus, building data and AI literacy among peers through structured workshops and community building.

- Drove AI literacy for 100+ students by designing and delivering 3 structured workshops on Generative AI, Gemini model capabilities, and prompt engineering.
- Built and sustained an 80-member campus tech community through consistent session documentation, structured reporting, and knowledge-sharing workflows.
- Curated hands-on demonstration sessions on data-driven decision-making, strengthening analytical reasoning across a cross-functional student cohort.
- Applied knowledge of Generative AI model behaviour and prompt engineering to guide responsible AI usage in analytical contexts.

Python Developer Intern

InternPe

Jul 2025 – Aug 2025

Remote · Full-Time · 6 Weeks

Completed a structured internship focused on Python development and OOP, delivering 4 end-to-end GUI and logic projects independently.

- Delivered 4 complete Python projects in 6 weeks — independently managing scope, structuring data flows, and validating all outputs against expected results.
- Built real-time GUI applications using Tkinter, applying event-driven programming, the `after()` scheduling method, and live data display via `time.strftime()`.
- Engineered logic engines for two game projects using 2D list-based board state, win/tie detection algorithms (horizontal, vertical, diagonal), and input validation — reducing logic errors to zero.
- Applied OOP principles via the `SnakeGame` class, implementing collision detection, score tracking, and a functional restart system.

5 . P R O J E C T S

Python Projects

Digital Clock

Aug 2025

Python · Tkinter · time module

- Built a real-time GUI digital clock displaying live hours, minutes, seconds, and AM/PM format, updating every second using the `after()` scheduling method.
- Applied custom font and colour styling; deepened understanding of event-driven GUI loops and real-time data display using `time.strftime()`.

Tic Tac Toe — Player vs CPU

Aug 2025

Python · random module · 2D list logic

- Developed a terminal-based Tic Tac Toe game with full win/tie detection across horizontal, vertical, and diagonal directions using modular function-based code.
- Implemented turn-based input validation and random CPU move logic, achieving zero board-overwrite errors across all test scenarios.

Snake Game

Aug 2025

Python · Tkinter · OOP · Canvas animation

- Created a fully playable Snake Game with arrow-key controls, randomised apple spawning, snake growth logic, score tracking, high score display, and a restart button.
- Applied OOP via the `SnakeGame` class; implemented game loop using `after()`, canvas object manipulation, and wall/self-collision detection.

Connect Four — Player vs CPU

Aug 2025

Python · random module · 2D grid logic

- Built a 6×7 Connect Four game with ASCII grid visualisation, letter-column/number-row mapping, and win detection in all directions including diagonal.
- Implemented CPU move validation preventing selection of full columns, and user input parsing into matrix coordinates.

Web Development Projects

Personal Portfolio Website

2025

HTML5 · CSS3 · JavaScript

- Designed and developed a personal portfolio website to showcase projects, skills, certifications, and contact information with a clean, responsive layout optimised for desktop and mobile.

Basic Calculator Web App

2025

[HTML5](#) · [CSS3](#) · [JavaScript](#) · [DOM Manipulation](#)

- Built a fully functional browser-based calculator supporting addition, subtraction, multiplication, and division with real-time input handling, result display, and clear/reset functionality.
- Implemented responsive layout for desktop and mobile; strengthened understanding of DOM manipulation, event handling, and UI/UX principles.

Classic Snake Game — Web Version

2025

[HTML5](#) · [CSS3](#) · [JavaScript](#) · [Canvas API](#)

- Recreated the Snake Game in the browser using the HTML5 Canvas API with smooth arrow-key movement, randomised apple spawning, snake growth logic, score tracking, and game-over detection on wall or self-collision.
- Deepened understanding of game loops, real-time rendering, collision detection, and responsive keyboard input handling.

3×3 Sliding Puzzle Game

2025

[HTML5](#) · [CSS3](#) · [JavaScript](#) · [Array-based logic](#)

- Developed an interactive 3×3 sliding puzzle with clickable/draggable tiles, randomised puzzle generation on each start, a move counter for performance tracking, and win detection with a success message.
- Practised algorithmic thinking, DOM manipulation, dynamic UI updates, and event handling — skills directly applicable to front-end data visualisation and reporting tools.

6. TECHNICAL SKILLS

Programming Languages: Python · C · C++ · HTML5 · CSS3 · JavaScript · SQL / MySQL

Python Libraries: Tkinter · random · time · Pandas (in progress) · NumPy (in progress) · Matplotlib (in progress)

Web Development: HTML5 · CSS3 · JavaScript · Canvas API · DOM Manipulation · Responsive Design · Flask (basic)

Data & Analytics: EDA fundamentals · Data Visualisation · Excel · Business Intelligence · Data-Driven Decision Making

Tools & Platforms: VS Code · Git · GitHub

Core CS Subjects: Data Structures & Algorithms · DBMS · OOP · Operating Systems · Computer Networks

Concepts: Event-Driven Programming · OOP · Game Logic · State Management · Input Validation · Prompt Engineering · Collision Detection

7. CERTIFICATIONS & TRAINING

- Google Gemini Student Ambassador Certificate · Google · Aug – Dec 2025 — Generative AI, prompt engineering, AI ethics, and developer tools.
- Web Development Certification · freeCodeCamp · 2025 — HTML5, CSS3, JavaScript, responsive design, and web projects.
- Python Programming — Code With Harry · Udemy · 2025 — Python fundamentals, OOP, GUI development with Tkinter, and project-based learning.

8. ACHIEVEMENTS & RECOGNITION

- Selected as Google Gemini Student Ambassador (2025) — chosen from the campus cohort to represent Google's AI and developer tools on campus.
- InternPe Python Developer Internship Completion Certificate (2025) — awarded upon successfully delivering all 4 projects within the 6-week program.
- Built 8 independent projects (4 Python + 4 Web) demonstrating consistent self-driven learning across two technology domains simultaneously.
- Completed 3 professional certifications (Google, freeCodeCamp, Udemy) alongside full-time B.Tech studies.

9. EXTRACURRICULAR & LEADERSHIP

- Campus Tech Community Lead · Founded and maintained an 80-member student tech community at Central University of Haryana, organising regular AI, Python, and web development learning sessions.
- Workshop Facilitator · Led 3 campus-wide AI and data workshops as Google Student Ambassador — managing content creation, logistics, participant engagement, and post-session documentation.
- Peer Mentor · Informally guided junior students on Python fundamentals, web development basics, and data concepts through the campus tech community.
- Active Self-Learner · Independently completed 8 projects and 3 certifications outside of academic curriculum, consistently applying new skills to real-world problem-solving.

10. INTERESTS & AREAS OF STUDY

- Data Science & EDA — Pattern recognition, trend identification, and anomaly detection in structured datasets.
- Python Development — Building functional, well-architected applications with clean OOP design and modular code.
- Web Development — Creating responsive, interactive browser-based tools and games using HTML5, CSS3, and JavaScript.
- Generative AI & LLMs — Prompt engineering, model behaviour analysis, and applied AI for real-world workflows.
- Algorithm Design & Game Logic — Implementing win-detection algorithms, state machines, and CPU decision logic.
